

Safety Management System Training

Fact Sheet

The introduction of SMS will require additional resources in most organisations. To utilize these resources not only in an effective way but also in a way that benefits your organisation, it's imperative to fully understand the requirements stipulated and the tools available.

Our modular training courses deliver all you need to know to develop an effective SMS, leading to a significant reduction in cost and expenses. The courses are tailored for the different target groups within your organization in mind; from the CEO to the crew.

Very good training, great value for money, and serious credential. Instructors are very professional and knowledgeable, and it's very interesting to exchange with the other participants and learn from them.

Pierre-François Salmand
Individual customer

The SMS Complete course was highly interactive, with a lot of practical skills-learning exercises added to the interesting topics. The instructor was very professional. Through this training I have gained a deeper and more practically-oriented understanding of SMS.

Tihana Pejša
Croatian Civil Aviation Authority

| Objectives

The participants will gain theoretical and practical knowledge in how to implement and manage an SMS and how to conduct hazard analysis, risk assessment and risk mitigation according to ICAO and EASA requirements.
